Bananas

Jamaica 1952
Scott No. 152
Banana Courier

North Americans eat more bananas each year than apples and oranges combined. They seem to have mass a-*peel.*

Bananas are the 4th most widely cultivated crop on earth after rice, wheat and corn.

The banana tree is a tree, it's the world's largest herb and the banana itself is actually a giant berry.

There is some evidence that it was really a banana that Eve picked in the Garden of Eden and not an apple.
