
Kinzua Bridge

The Kinzua Bridge was a railway trestle built in 1882. It was built from wrought iron and was **2,052 feet long and 301 feet tall.**

The Bridge spanned the **Kinzua Creek** and once was billed as the **"Eighth Wonder of the World"** and originally holding the record for **Tallest Railway Bridge** for two years.

In 1990 the Bridge was dismantled and rebuilt of steel to accommodate the heavier trains – unfortunately while being restored in 2003 a tornado destroyed a large portion of the Bridge, the corroded anchor bolts contributing to the collapse – the Ruins are now part of .....
